SUMMARY

Agronomy Technician with a crop and weed sciences degree and 2 seasons of field work in the Red River Valley. Handle soil sampling, crop scouting, fertilizer blending and sprayer operation for an ag retailer serving 90 growers.

EXPERIENCE

Agronomy Technician

03/2025 - Present

Red River Agronomy Center — Fargo, ND

Agronomy retailer serving 90 growers with fertilizer, chemical and custom application.

- Collect **5,000** grid soil samples a year with GPS mapping so agronomists can write fertility plans.
- Conduct crop scouting on 30,000 acres of wheat, soybeans and sugarbeets, reporting weed and disease pressure weekly.
- Operate the fertilizer blending plant during spring rush, loading 120 tenders a week with blends accurate to 1%.
- Maintain records for 400 custom application jobs in the dispatch system, with zero mis-applied fields.

Crop Scouting Intern

05/2024 - 08/2024

Northern Plains Seed Research — Casselton, ND

Summer internship at a private wheat and soybean breeding station.

- Identified 25 weed species in research plots and wrote weed identification notes for 3 breeders.
- Measured plant height, stand counts and lodging on 1,800 plots, with data entry checked twice a week.
- Supported plot harvesting with a small-plot combine, bagging and labeling 2,000 grain samples.

SKILLS

Soil Sampling

Crop Scouting

GPS Mapping

Fertilizer Blending

Sprayer Operation

Weed Identification

Plot Harvesting

Tissue Sampling

Data Entry

Attention to Detail
