Ethan Park

Analytics Intern

ethan.park@email.com ◆ (734) 555-0157 ◆ Ann Arbor, MI ◆ linkedin.com/in/ethanpark

Summary

Data science student at the University of Michigan, graduating in 05/2027, now an analytics intern at a 42-store regional grocery chain. Writes SQL and Python for data analysis on sales and shrink data, builds Power BI dashboards for district managers and presents findings to the operations team in PowerPoint. Comfortable with Excel, R and Tableau from coursework and a nonprofit role.

Experience

Analytics Intern

Great Lakes Fresh Market — Ann Arbor, MI — 05/2026 - Present

Regional grocery chain with 42 stores in Michigan and Ohio.

- Write **30+** SQL queries a month to pull store sales, shrink and labor data for the operations analytics team.
- Build a Power BI dashboard tracking weekly shrink across 42 stores, now opened by 12 district managers every Monday.
- Process 2 years of promotion data in Python with pandas, fixing 4,000 mismatched product codes before analysis.
- Present a PowerPoint study of produce markdown timing that pointed to $180K in yearly savings for 6 pilot stores.

Student Data Assistant (Part-Time)

Arbor Community Food Network — Ann Arbor, MI — 09/2024 - 04/2026

Nonprofit food bank supplying 30 pantries in Washtenaw County.

- Combined pantry visit and volunteer records from 3 spreadsheets into one Excel workbook covering 18,000 visits.
- Created monthly R charts on visits by ZIP code that the director used in 2 successful grant applications.
- Checked donor records for duplicates and typos, cutting the mailing list error rate from 9% to 2%.
- Trained 6 staff members on a new Excel intake template and wrote a one-page guide for volunteers.
