SUMMARY

Highly skilled Automation Tester with 5+ years of experience in designing, developing, and implementing automated testing solutions for software applications. Proficient in a range of testing tools and technologies, with a strong focus on delivering high-quality results and driving process improvements.

EXPERIENCE

Senior Automation Tester

Jan 2020 - Present

TechCorp

New York, USA

Leading the development and implementation of automated testing solutions for multiple software applications, resulting in a 30% reduction in testing time and a 25% increase in test coverage. Collaborating with cross-functional teams to identify and prioritize testing requirements, and developing and executing automated testing scripts using Selenium and Appium. Mentoring junior team members and providing guidance on testing best practices and industry trends.

- Designed and developed automated testing frameworks using Java and Python
- Implemented automated testing scripts for web and mobile applications, resulting in a 40% decrease in testing time
- Collaborated with development teams to identify and resolve defects, resulting in a 20% reduction in defect leakage

Automation Tester

Jun 2018 - Dec 2019

QualitySoft

London, UK

Developed and executed automated testing scripts for software applications using TestComplete and TestNG. Worked with testing teams to identify and prioritize testing requirements, and collaborated with development teams to resolve defects and improve software quality. Participated in Agile scrum teams and contributed to the development of testing plans and strategies.

- Developed and maintained automated testing scripts for multiple software applications
- Collaborated with testing teams to develop and execute manual testing plans
- Participated in defect triage and contributed to the development of defect reports

EDUCATION

Bachelor of Science in Computer Science

Sep 2014 - Jun 2018

University of California

California, USA

Computer Science

3.5/4.0

PROJECTS

Automated Testing Framework

Jan 2020 - Mar 2020

Lead Developer

Developed an automated testing framework using Selenium and Java, resulting in a 50% reduction in testing time and a 30% increase in test coverage. Collaborated with cross-functional teams to identify and prioritize testing requirements, and developed and executed automated testing scripts.
