SUMMARY

Biomedical Equipment Technician III with 10 years in hospital healthcare technology management, now lead technician for anesthesia machines, ventilators and dialysis equipment at a 520-bed teaching hospital. Handles advanced diagnostics and biomedical equipment maintenance, mentors junior technicians, and uses a working knowledge of physiology and medical terminology with clinical teams.

EXPERIENCE

Biomedical Equipment Technician III 04/2022 - Present

Ridgeview University Medical Center Pittsburgh, PA

Lead technician for critical care and surgical equipment in a 520-bed teaching hospital.

- Lead a team of 5 technicians supporting surgery and ICUs, holding critical-equipment PM completion at **100%**.
- Run advanced diagnostics on 60 anesthesia machines and 85 ventilators, cutting average repair time from 4 days to 2.
- Mentor 3 new BMET I and II hires through a 6-month competency plan covering physiology and safety.
- Plan equipment downtime with OR and ICU managers, raising customer service survey scores to 4.7 of 5.

Biomedical Equipment Technician II 06/2018 - 03/2022

Laurel Highlands Medical Center Greensburg, PA

Community hospital with 290 beds and a cardiac catheterization lab.

- Repaired and calibrated 1,500 devices across surgery, cath lab, dialysis and labor and delivery.
- Investigated 22 device-related incidents and filed reports with the safety committee within 72 hours.
- Balanced 300 open work orders a quarter through steady time management, closing 92% inside the 10-day target.
- Wrote 12 troubleshooting guides for nurses on common pump and monitor alarms.

Biomedical Equipment Technician I 06/2016 - 05/2018

Keystone Biomedical Services Pittsburgh, PA

Independent service organization for clinics and nursing homes.

- Completed 1,000 preventive maintenance inspections a year on pumps, monitors and beds.
- Performed electrical safety testing on all incoming equipment at 15 client sites.
- Logged 1,800 work orders a year in the CMMS with full parts and labor detail.
