SUMMARY

Cable technician with 20 months of structured cabling and fiber work on office, school and data center projects around Charlotte. Installs and terminates Cat6 and fiber optic cable, tests links with OTDRs and power meters, and brings attention to detail and steady troubleshooting to every punch list.

EXPERIENCE

Cable Technician

02/2025 - Present

Queen City Network Services — Charlotte, NC

Installer for a low-voltage contractor with 30 field technicians.

- Install and terminate **2,400+** Cat6 drops across 14 office, school and clinic projects.
- Test copper and fiber links with OTDRs and power meters, passing 99% of runs on first certification.
- Perform fiber optic cable installation through conduit and cable tray on 3 data center expansions.
- Diagnose dead jacks, crossed pairs and mislabeled ports on 30+ service calls, recording each fix in Excel.

Low Voltage Apprentice

03/2024 - 01/2025

Piedmont Electric & Data — Gastonia, NC

Apprentice on a commercial electrical and data cabling crew.

- Pulled **150,000** ft of Cat6 cable for 3 new school buildings and a hospital wing.
- Installed racks, ladder rack and J-hooks with power tools under a journeyman's direction.
- Labeled and dressed 40 patch panels, matching each port to the as-built drawings.
- Completed 200+ fusion splicing reps on training fiber, averaging 0.03 dB loss before field assignments.
