Summary

Cleanroom technician 10 months into a Class 100 semiconductor fab role, following gowning, contamination control and wafer handling procedures on night shift. Logs tool data in Microsoft Excel, writes clear shift notes in Microsoft Word and brings 3 years of customer service experience, organizational skills and attention to detail to a fast-paced floor.

Experience

01/2026 - Present
Boise, ID

Cleanroom Technician

Treasure Valley Microelectronics

Wafer fab producing power and sensor chips on 200 mm lines for automotive customers.

- Handle wafer lots on 8 etch and deposition tools, moving **1,200** wafers a week with no handling breaks.
- Maintain gowning and contamination control standards that keep the bay under particle limits on every weekly audit.
- Monitor tool alarms and record readings in Microsoft Excel logs, escalating 14 out-of-spec events to process engineers.
- Organize cleanroom supplies and tool wipe-downs to SOP so each of the 4 shifts starts with a ready bay.

11/2022 - 12/2025
Boise, ID

Customer Service Associate

Capital City Home Supply

Hardware and home goods store, part-time while earning an electronics degree.

- Resolved 60+ customer questions a shift on products, orders and returns, earning a 4.8 out of 5 survey score.
- Processed special orders and returns in the store system, with accurate counts at every quarterly inventory audit.
- Trained 5 new cashiers on register steps, return policy and store safety rules in their first week.
- Reorganized the receiving area and shelf labels, cutting stock searches for the 9-person crew by about half.
