Summary

Collision technician with 7 years in high-volume collision centers around Sacramento, repairing 15-18 steel and aluminum vehicles a month. Handles structural repair, sectioning and repair-or-replace calls on damaged parts, and follows federal, state, and local regulations on hazardous waste. I-CAR Platinum and ASE B4 certified.

Experience

Collision Technician 02/2022 - Present
Capitol Collision Centers Sacramento, CA
Regional group of 7 collision centers; this location repairs about 190 vehicles a month.

- Repair **15-18** vehicles a month, including structural repair on rails, pillars and rocker panels.
- Perform sectioning and resistance spot welding to OEM specs, passing 100% of DRP quality audits in 2025.
- Cut parts costs by repairing damaged parts instead of replacing them on 30% of eligible bumpers and fenders.
- Manage hazardous waste labeling, solvent recycling and spill logs, with zero findings in 3 county inspections.

Body Technician 06/2019 - 01/2022
Delta Auto Body Stockton, CA
Independent collision shop with 9 bays serving insurance and fleet customers.

- Completed dent repair and panel alignment on 40+ light-damage jobs a month.
- Measured unibody damage with frame measuring equipment on 60+ pulls a year, logging before-and-after printouts.
- Trained 2 apprentices on panel removal, tool safety and shop cleanup routines.
