SUMMARY

Construction Carpenter with 6 years on multifamily and light commercial projects around Austin, covering framing, sheathing and concrete formwork on wood-frame and podium buildings. Reads structural drawings, runs hand tools and power tools safely and works without close supervision. Valid Texas driver's license, OSHA 30 and a clean safety record on every job.

EXPERIENCE

Construction Carpenter

05/2023 - Present

Hill Country Constructors

Austin, TX

General contractor building multifamily and light commercial projects.

- Build wall, floor and roof truss framing on 3-story apartment buildings, about **120** units a year.
- Set and strip concrete formwork for foundations, grade beams and stair landings on 4 buildings.
- Install sheathing, blocking and hold-downs per structural drawings, passing 95% of framing inspections the first time.
- Operate power tools and hand tools under company safety rules, with no lost-time injuries in 3 years.

Framing Carpenter

03/2021 - 04/2023

Lone Star Framing

Round Rock, TX

Framing subcontractor for regional home builders.

- Framed and sheathed **70+** single-family homes with a 5-person crew, including stairs and porches.
- Cut rafters and laid out roof framing from blueprints on 25 custom hip and gable roofs.
- Checked plates for square and level before each wall raise, reducing builder framing corrections by 30%.
- Loaded and organized the crew trailer each morning so work started on time at every site.

Construction Laborer

01/2020 - 02/2021

Pflugerville Site Works

Pflugerville, TX

Concrete and site work contractor.

- Stripped, cleaned and stacked form panels for reuse on **30** slab foundations.
- Set rebar chairs and vapor barrier ahead of 2-3 pours a week for the concrete foreman.
- Moved materials with a skid steer and kept walkways clear for inspectors on 30 sites.
