Summary

EEG technician with a 2025 neurodiagnostic technology degree and 1 year of routine and ambulatory EEG testing at an outpatient neurology clinic. Applies 10-20 electrode placement, spots artifact early and keeps patients calm through photic and hyperventilation activation. Brings attention to detail, good computer skills and 2 earlier years of hospital patient care.

Experience

EEG Technician

07/2025 - Present

Coastline Neurology Associates

Irvine, CA

Outpatient neurology practice with 6 neurologists and a 2-room EEG lab.

- Perform 6-8 routine EEG tests a day for adults and children, from history intake to the technical report.
- Measure heads and apply electrodes by 10-20 electrode placement, holding impedances under 5 kOhms on 98% of studies.
- Set up 4-5 ambulatory EEG patients a week and teach families the event button, with 72-hour files returned complete.
- Document seizures, activation responses and artifact in each record so neurologists can read studies the same day.
- Run photic stimulation and hyperventilation on about 120 routine studies a month unless the order rules them out.

Patient Care Technician

08/2023 - 06/2025

Harbor Coast Medical Center

Costa Mesa, CA

Part-time role on a neuroscience step-down unit while completing the degree.

- Recorded vital signs and intake and output for 10-12 patients per shift on a 24-bed neuro unit.
- Observed patients on seizure precautions and reported changes in alertness to nurses within minutes.
- Charted care in the EHR with correct medical terminology and passed every quarterly chart audit.
- Turned and repositioned patients with lift equipment, with 0 patient falls or staff injuries in 2 years.

Education

Associate in Science

06/2025

Orange Coast College

Costa Mesa, CA
