SUMMARY

Emergency veterinary technician with 4 years on overnight and weekend shifts in 24-hour ER hospitals. Runs triage for walk-ins, places IV catheters in shock patients, and handles patient monitoring, venipuncture and blood transfusions for critical cases. RECOVER-certified in CPR, with a strong work ethic and clear communication on 12-hour shifts.

EXPERIENCE

Emergency Veterinary Technician

08/2023 - Present

Schuylkill Veterinary Emergency and Specialty

Philadelphia, PA

24-hour emergency and specialty hospital seeing about 70 ER cases a day.

- Triage 25+ walk-in patients a shift, ranking them by vital signs and history for the ER doctors.
- Establish IV catheters and shock fluid therapy within 10 minutes of arrival for unstable patients.
- Monitor anesthesia for emergency surgeries such as GDVs, foreign bodies and C-sections, about 6 a week.
- Run CPR as part of RECOVER-trained teams on 3-4 arrests a month and record every drug given in real time.

ICU Veterinary Technician

06/2022 - 07/2023

Lehigh Valley Pet ER

Allentown, PA

Overnight intensive care technician in an emergency hospital.

- Cared for up to 12 ICU patients a night, recording vitals, fluids and pain scores every 2 hours.
- Collected blood gases, PCV/TS and lactate on critical patients and reported changes to the overnight doctor.
- Prepared and administered 2-4 blood transfusions a week with cross-match and transfusion monitoring.
- Calculated constant-rate infusions for pain and blood pressure drugs and double-checked each one with the doctor.

Veterinary Assistant

09/2020 - 05/2022

Main Line Animal Hospital

Bryn Mawr, PA

Part-time role while completing a veterinary technology degree.

- Handled about 30 patients a day for exams, blood draws and radiographs.
- Prepared 15 surgical packs a week and ran each autoclave cycle with indicator strips.
- Set up 4 exam rooms between appointments during evening urgent care hours.
