### SUMMARY

ERP developer with 4 years building extensions, reports and integrations for Oracle EBS and SQL Server-based ERP systems in manufacturing and distribution. Writes C# and PL/SQL, designs SSRS and Oracle Reports output, and handles troubleshooting of production jobs with the attention to detail that keeps month-end close on schedule.

### EXPERIENCE

#### ERP Developer

05/2024 - Present

Scioto Valley Manufacturing

Columbus, OH

*Automotive parts supplier running Oracle EBS with a SQL Server data warehouse.*

- Develop C# services that sync **12,000** daily shop-floor transactions from SQL Server into Oracle EBS.
- Build a Blazor portal for supplier quality claims, replacing an emailed spreadsheet used by 70 suppliers.
- Convert 18 legacy Oracle Forms screens to Oracle APEX pages, cutting data entry clicks by about 40%.
- Write PL/SQL packages for cost roll-ups and fix reported defects within the 2-day window set by finance.

#### Application Developer

06/2022 - 04/2024

Buckeye Industrial Supply

Dublin, OH

*Industrial distributor with a custom ERP built on SQL Server.*

- Created **35** SSRS reports for sales, purchasing and inventory teams, retiring a manual weekly Excel pack.
- Maintained Oracle Reports invoice and packing slip layouts printed 3,000 times a day across 4 branches.
- Traced failed nightly jobs through troubleshooting of SQL Server Agent logs, raising job success to 99.5%.
- Documented 40 stored procedures and shared code review notes with the team in Microsoft Teams.
