SUMMARY

Fabrication technician with 5 years of metal fabrication on process skids, stairs and pipe supports, after 2 years as a trailer shop hand. Cuts, fits and welds carbon and stainless steel from prints, checks work with measuring instruments and micrometers, and uses basic math skills for layout daily. AWS certified, with steady attention to detail.

EXPERIENCE

Fabrication Technician 04/2023 - Present

Red Fork Process Equipment Tulsa, OK

Builder of oil, gas and chemical process skids shipped to Gulf Coast plants.

- Fabricate structural skids up to 40 feet long from shop drawings, finishing 65 units with no dimensional rework.
- Perform MIG and TIG welding on carbon and stainless pipe supports, passing 100% of visual and dye-penetrant checks.
- Calculate cut lists and hole patterns with measuring instruments, saving about 8% of plate stock through better nesting.
- Operate plasma tables, press brakes and iron workers to prep 300+ parts a week for the fit-up crew.

Fabricator Helper 08/2021 - 03/2023

Cimarron Steel Works Broken Arrow, OK

Structural and miscellaneous steel shop serving commercial contractors.

- Assembled and tacked stair stringers and handrails for 25 commercial jobs using hand tools and clamps.
- Measured parts with tapes, squares and micrometers against prints before sending them to the welders.
- Organized the steel rack and consumables cage, cutting material search time for a 12-person crew.
- Completed paint prep and loading of finished steel, meeting 95% of promised ship dates.

Shop Hand 06/2019 - 07/2021

Osage Trailer Company Sand Springs, OK

Maker of livestock and flatbed trailers.

- Cut and drilled frame members for 10 trailers a week on band saws and drill presses.
- Handled deck and wiring installs on 6 flatbeds a week under the lead fabricator.
- Maintained 8 saws, grinders and welding leads so the line lost no shifts to tool failures.
