

Kayla Morrison

Field Operator

Lake Charles, LA (337) 555-0181 kayla.morrison@email.com

[linkedin.com/in/kaylamorrison](https://www.linkedin.com/in/kaylamorrison)

SUMMARY

Field operator with 1.5 years at an LNG export terminal and a process technology degree from SOWELA. Makes outside rounds on pumps and compressors, pulls samples and writes clear log entries, with steady radio communication to the board operator. Committed to safe work permits and attention to detail on 12-hour rotating shifts.

SKILLS

Outside Rounds • Pumps and Compressors • Process Samples • Permit to Work • Lockout/Tagout • P&ID Reading
Radio Communication • Process Safety • Attention to Detail

EXPERIENCE

Field Operator

05/2025 - Present

Calcasieu LNG Terminal

Lake Charles, LA

LNG liquefaction and export terminal with 2 trains.

- Complete outside rounds on 2 liquefaction trains, logging readings from 80+ gauges and transmitters each shift.
- Check pumps and compressors for vibration, leaks and seal pot levels, reporting 25 issues before they caused trips.
- Collect process samples for the lab and keep chain-of-custody forms complete on every sample.
- Coordinate equipment isolation for maintenance under the permit to work system and lockout/tagout, with no permit errors.

Store Associate (Part-Time)

08/2022 - 04/2025

Bayou Farm and Ranch Supply

Sulphur, LA

Weekend job during the process technology program.

- Unloaded and stocked 2 freight trucks a week and kept the feed warehouse organized.
- Answered customer questions on fencing and equipment, building sales of 40 add-on items a month.
- Operated a forklift to load 30+ customer orders of feed and fencing each Saturday.

Process Technology Intern

05/2024 - 08/2024

Westlake Coastal Refining

Westlake, LA

Summer internship at a 120,000 barrel-per-day refinery.

- Shadowed outside operators on 40 shifts across the crude and hydrotreating units.
- Traced 15 piping and instrument diagrams in the field and marked changes for the unit engineer.
- Drafted 6 updated round sheets that operators still use on the crude unit.
