Summary

Field technician with 2 years installing and repairing fiber and copper networks for homes and businesses around Tulsa. Handles fiber optic splicing, OTDR testing and structured cabling, works independently on 6 to 8 jobs a day, and keeps customer service friendly and clear at every stop.

Experience

03/2025 - Present
Tulsa, OK

Field Technician

Green Country Fiber

Regional fiber internet provider with 40,000 home and business subscribers.

- Install fiber drops and home networks at **6** to 8 customer sites a day across the Tulsa metro.
- Perform fiber optic splicing and OTDR testing on new builds, with 99% of splices passing the first test.
- Resolve 25 repair tickets a week through troubleshooting of ONTs, routers and damaged drops.
- Record job photos, test results and materials in Excel and Microsoft Office forms before leaving each site.

06/2024 - 02/2025
Broken Arrow, OK

Cable Installer

Arkansas Valley Communications

Low-voltage contractor wiring offices, schools and warehouses.

- Pulled and terminated structured cabling for **1,200** data drops in 3 school buildings.
- Tested every Cat6 run with a cable certifier and fixed 40 failed terminations before handoff.
- Mounted racks, patch panels and wireless access points on 15 commercial jobs.
- Coordinated daily start times and site access with general contractor supervisors through Outlook.
