SUMMARY

Lease operator with 5 years in the Permian Basin, running a route of 45 oil wells on ESPs, gas lift systems and rod pumps. Uses SCADA to spot problems early, handles basic maintenance on site and reports daily production on time. Works independently across long routes with a clean driving record and H2S Clear training.

EXPERIENCE

Lease Operator 01/2023 - Present

Caprock Energy Partners Midland, TX

Permian Basin operator with about 400 horizontal wells.

- Operate a **45**-well route of ESPs and gas lift systems producing about 6,500 barrels of oil per day.
- Track well alarms and trends in SCADA, catching ESP failures early and cutting average downtime by 20%.
- Perform basic maintenance on separators, heater treaters and valves, closing 90% of issues without a callout.
- Complete tank gauging and daily production reports by 9 a.m., with zero missed run tickets in 2025.

Pumper 06/2021 - 12/2022

Llano Estacado Production Co. Andrews, TX

Conventional oil producer running 70 rod-pump wells.

- Checked 70 rod-pump wells a day and adjusted pumping unit run times to match fluid levels.
- Treated wells with chemical programs for paraffin and scale, extending average run life by 4 months.
- Coordinated hot oil, well service and haul trucks for 15 to 20 jobs a month.
- Logged well tests and water hauls on the field computer for the production engineer.

Roustabout 04/2020 - 05/2021

Basin Field Services Odessa, TX

Oilfield service crew for well sites and tank batteries.

- Built and repaired flowlines and tank battery piping on 30+ locations.
- Set up containment and pumps for 12 tank cleanouts following H2S and PPE rules.
- Operated a skid steer and backhoe for site cleanup and road repairs.
