Serves patients from 12+ ethnic backgrounds with sensitive, individualized education

SUMMARY

Mission-driven Community Health LPN with 6 years of experience delivering public health nursing services in federally qualified health centers (FQHCs) and community clinics serving underserved and uninsured populations. Skilled in chronic disease screening, immunization programs, care coordination, and culturally competent patient education. Helped increase clinic hypertension control rates by 37% through targeted community outreach and follow-up care.

EXPERIENCE

LPN - Community Health

Feb 2020 - Present

Johns Hopkins Community Physicians - East Baltimore Health Center

Baltimore, MD

- Provided nursing care and health screenings for 40-50 patients per day in an FQHC serving a predominantly uninsured and Medicaid population
- Increased clinic hypertension control rate by 37% by implementing a nurse-led blood pressure monitoring and follow-up telephone intervention program
- Administered 500+ immunizations per year including flu, pneumococcal, HPV, and COVID-19 boosters with 100% documentation accuracy
- Coordinated care for 80+ patients with chronic conditions (diabetes, hypertension, asthma) between clinic visits using a proactive outreach model
- Provided culturally sensitive health education to patients from 12+ ethnic backgrounds on preventive care, medication adherence, and nutrition

Licensed Practical Nurse

Mar 2018 - Jan 2020

University of Maryland Medical Center

Baltimore, MD

- Provided inpatient nursing care for 20 medical-surgical patients per shift, administering medications and performing clinical assessments
- Participated in community health fair events, conducting blood pressure and blood glucose screenings for 200+ community members
