99.4% first-attempt peripheral IV cannulation rate over 5 years

Safety Record

Zero serious adverse events across 5 years of infusion administration

PICC Line Expertise

Zero PICC-related bloodstream infections with full INS compliance

SUMMARY

Skilled Infusion Therapy LPN with 5 years of experience administering IV antibiotics, biologics, immunoglobulin therapies, and hydration infusions in outpatient infusion center and home infusion settings. Expert in peripheral and PICC line access, infusion pump management, and adverse reaction monitoring. Maintains a 99.4% first-attempt cannulation rate with zero infusion-related serious adverse events over 5 years.

EXPERIENCE

LPN - Infusion Therapy Jul 2021 - Present
Option Care Health - St. Louis Infusion Center St. Louis, MO

- Administered IV antibiotics, IVIG, biologic therapies (Remicade, Orencia), and hydration infusions for 15-20 patients per shift in a high-volume outpatient center
- Maintained a 99.4% first-attempt peripheral IV cannulation rate and zero serious adverse events across 5 years of infusion administration
- Monitored patients for infusion reactions during treatment, recognizing and responding to 12 mild/moderate reactions requiring intervention without escalation to serious adverse events
- Managed PICC line dressing changes, flushes, and blood draws in accordance with INS standards, maintaining zero PICC-related bloodstream infections
- Documented all infusion parameters, patient responses, and lot numbers in Infusion Soft EHR with 100% lot traceability compliance

Licensed Practical Nurse May 2019 - Jun 2021
BJC HealthCare - Missouri Baptist Medical Center St. Louis, MO

- Provided direct nursing care for 20-22 medical-surgical patients per shift, administering IV medications and performing patient assessments
- Completed IV therapy certification and performed 200+ successful IV starts in the hospital setting
