SUMMARY

Maintenance millwright with 8 years keeping food and tire manufacturing lines running. Strong in mechanical troubleshooting, hydraulics, pneumatics and gearbox repair, with vibration analysis and laser shaft alignment to stop failures early. Keeps accurate CMMS work orders and pays close attention to detail on every preventive maintenance task.

EXPERIENCE

Maintenance Millwright

04/2022 - Present

Upstate Foods Manufacturing

Greenville, SC

Frozen food plant with 8 processing and packaging lines running 3 shifts.

- Resolve mechanical failures on fryers, spiral freezers and packaging lines, lifting line uptime from 91% to **96%**.
- Repair hydraulics and pneumatics on case packers and palletizers, rebuilding 30 cylinders a year in house.
- Run monthly vibration analysis routes on 120 motors and gearboxes, catching 14 bearing failures early.
- Write CMMS work orders and preventive maintenance procedures, raising PM compliance from 78% to 94%.

Millwright

05/2019 - 03/2022

Piedmont Tire Works

Spartanburg, SC

Radial tire plant with mixers, extruders and curing presses.

- Rebuilt extruder gearboxes and mixer drives, saving about \$90,000 in outside repair costs.
- Aligned 50 drive trains with laser shaft alignment tools after rebuilds and motor swaps.
- Replaced curing press hydraulic seals and valves, cutting leaks on 24 presses by half.
- Lubricated and inspected conveyors and bead winders on weekly routes with lockout/tagout.

Maintenance Technician

01/2018 - 04/2019

Carolina Textile Mills

Greer, SC

Yarn spinning plant with 40 spinning frames and 6 winders.

- Replaced bearings, belts and rollers on 40 spinning frames under a senior millwright.
- Logged repairs and parts in the CMMS, completing 300 work orders in 15 months.
- Troubleshoot winder drive faults with the electrician on call, restoring most frames within one shift.
