SUMMARY

.NET developer with 5 years of experience building ASP.NET MVC and Web API applications in C# on SQL Server. Moves legacy .NET Framework and WCF systems to modern .NET and writes Entity Framework data access. Supports the billing, scheduling and leasing staff who use the software every day and fixes their issues quickly.

SKILLS

C# • ASP.NET • .NET • Entity Framework • Web API • MVC • SQL Server • JavaScript • jQuery • HTML

EXPERIENCE

.NET Developer 01/2023 - Present

Sonoran Health Partners Phoenix, AZ

Billing and scheduling systems for 40 outpatient clinics in Arizona.

- Migrated a 300,000-line .NET Framework billing app to .NET 8, cutting server costs by **35%**.
- Built ASP.NET Web API endpoints with Entity Framework Core for a claims status tool used by 600 staff.
- Rewrote SQL Server stored procedures and indexes, bringing the daily claims export from 50 to 12 minutes.
- Replaced legacy WCF services with REST APIs, planning the cutover with three vendor integration teams.

Junior .NET Developer 06/2021 - 12/2022

Desert Ridge Property Group Scottsdale, AZ

Property management software for 9,000 rental units.

- Developed ASP.NET MVC pages with jQuery and AJAX for lease renewals and maintenance requests.
- Converted 12 VB.NET batch jobs to C#, ending a weekly manual rerun of failed jobs.
- Answered tickets from leasing staff and fixed reported defects within a two-day target.
- Added xUnit tests around rent calculation logic after a proration bug, preventing repeat billing errors.

Student Programmer 08/2019 - 05/2021

Arizona State University IT Services Tempe, AZ

Part-time role on the campus applications team.

- Updated C# and HTML forms in an internal parking permit app used by 15,000 students.
- Wrote SQL reports for the parking office that replaced manual counts at semester start.
- Tracked bug reports from parking staff in a shared queue and closed most of them within a week.
