SUMMARY

Poultry scientist with 6 years in broiler nutrition and live production research for an integrated poultry company. Designs pen and house trials, tracks feed conversion and livability across company and contract farms, and works with veterinarians on biosecurity and welfare audits.

EDUCATION

Master of Science (M.S.) 05/2020

Auburn University Auburn, AL

Poultry Science

EXPERIENCE

Poultry Scientist 02/2022 - Present

Chattahoochee Poultry Farms Gainesville, GA

Research and development group of an integrated broiler company processing 2.5 million birds a week.

- Design 12 pen and floor trials a year on broiler nutrition, testing enzymes, coccidiostat programs and amino acid levels.
- Analyze live performance data from **140** contract houses in JMP, improving feed conversion by 3 points in 2 years.
- Conduct necropsy and gut health scoring on 600 birds a quarter with the company veterinarian.
- Audit biosecurity and welfare practices on contract farms, closing 95% of findings within 30 days.

Poultry Research Associate 07/2020 - 01/2022

Oconee Poultry Research Farm Watkinsville, GA

Contract research farm running nutrition and health trials for feed and animal health companies.

- Managed daily care, weighing and feed records for **9,600** broilers across 96 research pens.
- Mixed experimental diets at the farm feed mill and checked each batch against formulation specs.
- Compiled hatchery management data on egg weight, fertility and hatch of fertile for 3 breeder flocks.

SKILLS

Broiler Nutrition • **Live Production Research** • **Feed Conversion** • **Necropsy** **Gut Health Scoring** • **Biosecurity** • **Welfare Audits** • **Hatchery Management** • **JMP**
