
Kevin Tran

Production Control Specialist

kevin.tran@email.com ♦ (316) 555-0141 ♦ Wichita, KS ♦ linkedin.com/in/kevintran

Summary

Production control specialist with 4 years in aerospace parts manufacturing, managing work order flow, shortages and shop floor priorities in SAP. Uses data analysis in Microsoft Excel to spot late jobs early, and pairs attention to detail with problem-solving skills when parts, paperwork or schedules fall out of line.

Experience

Production Control Specialist

Prairie Wind Aerostructures — Wichita, KS — 02/2024 - Present

Specialist for a fuselage subassembly area with 180 mechanics on 2 shifts.

- Control the release and flow of **400** active work orders in SAP for 6 subassembly cells.
- Run a daily shortage meeting with supply chain and quality, clearing 85% of shortages within 48 hours.
- Verify work order travelers and stamps before each move, cutting paperwork-related holds by 35%.
- Build PowerPoint production control reports on cell output and late orders for weekly leadership reviews.

Production Control Coordinator

Sunflower Composite Parts — Derby, KS — 07/2022 - 01/2024

Coordinator at a composite bonding shop supplying aircraft interiors.

- Released 70 jobs a week in the ERP and staged cured parts for trim, inspection and paint.
- Grouped autoclave loads by cure cycle in Microsoft Excel, adding 2 extra loads per week.
- Expedited about 10 aircraft-on-ground parts a week for airline customers, tracking each to ship.
- Updated Microsoft Office Suite templates for travelers and move tickets used by 3 shifts.
