SUMMARY

ARRT-registered radiation therapist with 1 year of staff experience and 1,500 clinical rotation hours, delivering daily treatments on two Varian linear accelerators. Positions and immobilizes patients to the prescription, runs CBCT image guidance and documents every fraction in ARIA. Works independently on the machine and brings attention to detail and a calm, compassionate manner.

SKILLS

- Radiation Therapy
- Linear Accelerators
- ARIA
- CT Simulation
- CBCT Image Guidance
- Patient Positioning
- Immobilization Devices
- Radiation Safety
- Work Independently
- Attention to Detail

EXPERIENCE

Radiation Therapist I

07/2025 - Present

Scioto Valley Cancer Center

Columbus, OH

Community radiation oncology center with 2 linear accelerators and a CT simulator, treating 60 patients a day.

- Deliver radiation therapy to **30+** patients a day as prescribed by the radiation oncologist.
- Position patients with masks, vac-loc bags and breast boards, staying within 3 mm setup tolerances on CBCT review.
- Verify patient identity, prescription and plan in ARIA before each fraction, with zero treatment errors in 6,000+ fractions.
- Monitor patients on camera during treatment and report skin and fatigue reactions to the oncology nurse.

Radiation Therapy Student

08/2023 - 05/2025

Olentangy Regional Medical Center

Columbus, OH

Clinical rotations in a hospital radiation oncology department, part of the degree program.

- Completed 1,500 clinical hours on linear accelerators, CT simulation and brachytherapy under supervision.
- Performed 120 supervised CT simulations, building custom immobilization devices for head and neck patients.
- Ran morning linac warm-up and daily QA checks with staff therapists for 2 semesters.
- Explained side effects and skin care to new patients, using printed guides in English and Spanish.
