SUMMARY

Senior supplier quality engineer with 9 years in aerospace electronics and medical devices, working to AS9100 and ISO 13485. Qualifies new suppliers, leads supplier audits and FMEA reviews, and drives supplier CAPA and 8D work that cut purchased-part escapes by more than half in 3 years.

EXPERIENCE

Senior Supplier Quality Engineer

03/2022 - Present

Sonoran Avionics

Phoenix, AZ

Maker of flight control and display electronics for business jets and military aircraft.

- Own supplier quality for 60 circuit board, cable and machining suppliers covering **\$140M** in annual spend.
- Lead 20 supplier audits a year to AS9100, with 92% of corrective actions closed on time.
- Qualify 12 new suppliers a year through first article reviews, PPAP-style data packages and process FMEA reviews.
- Drive supplier CAPA and 8D on escapes, reducing purchased-part escapes from 48 to 21 a year.

Supplier Quality Engineer

07/2019 - 02/2022

Desert Ridge Medical

Tempe, AZ

Manufacturer of surgical staplers and disposable instruments.

- Managed **35** suppliers of molded and machined components under ISO 13485 and FDA requirements.
- Reviewed control plans and SPC data every quarter, putting 6 suppliers on improvement plans.
- Resolved GD&T disputes on 30 drawings, aligning supplier inspection with design intent.

Quality Engineer

06/2017 - 06/2019

Camelback Machining

Chandler, AZ

CNC job shop serving aerospace and semiconductor equipment customers.

- Inspected first articles on **150** machined parts and wrote 40 nonconformance reports.
- Trained 20 operators on gauge use and visual inspection standards.
- Measured 2,000 parts a month on CMM and height gauges against GD&T drawings.
