

Brian Okafor

Special Procedures Technologist

Nashville, TN · (615) 555-0139 · brian.okafor@email.com · linkedin.com/in/brianokafor

SUMMARY

ARRT-registered Special Procedures Technologist with 7 years of imaging experience and 5 years in special procedures and interventional radiology. Handles angiography, biopsies, drains, myelograms and CT-guided cases at 5-8 per day, with careful patient positioning, sterile technique and dose-aware fluoroscopy.

EXPERIENCE

Special Procedures Technologist 10/2022 - Present
Cumberland River Medical Center Nashville, TN

420-bed hospital with 2 special procedures rooms and a CT-guided biopsy program.

- Perform 5-8 special procedures a day, including angiograms, PICC and port placements, paracentesis and nephrostomy tubes.
- Run CT-guided lung, liver and bone biopsies with the radiologist, about 35 cases a month.
- Plan patient positioning for prone, oblique and lateral approaches, cutting room setup time from 20 to 12 minutes.
- Maintain sterile technique and room turnover standards, with zero procedure-related infections in 4 years.

Interventional Radiology Technologist 10/2021 - 09/2022
Harpeth Valley Hospital Franklin, TN

220-bed community hospital with 1 IR suite and 24-hour call.

- Scrubbed 150+ interventional radiology cases in 12 months, from diagnostic angiograms to biliary drains.
- Set up power injectors, catheters and guidewires for each case and kept the IR supply count accurate.
- Covered after-hours call 1 week in 4 for GI bleeds, abscess drains and trauma angiography.

Radiologic Technologist 06/2019 - 09/2021
Harpeth Valley Hospital Franklin, TN

- Performed 30+ radiographic and fluoroscopy exams per shift across the ED, OR and outpatient clinic.
- Prepared trays and positioned patients for about 25 myelograms, arthrograms and lumbar punctures a month.
- Checked images in PACS for positioning and exposure before release and kept repeat rates under 3%.

SKILLS

Special Procedures
