Summary

Specimen processor with 1 year in a high-volume reference lab, receiving and preparing 400+ patient specimens a shift. Handles accessioning and data entry in the LIS, centrifuges and aliquots blood and urine samples, and follows HIPAA and biohazard rules on every specimen. Certified phlebotomy technician with strong computer skills.

Experience

Specimen Processor

Gulf Coast Diagnostic Laboratories — Tampa, FL — 09/2025 - Present

Night-shift processor in a reference lab handling samples from 300 client offices.

- Process **400+** specimens per shift, matching every tube to its requisition before it reaches testing.
- Perform data entry for 150 requisitions a shift in the LIS, holding the entry error rate under 0.5%.
- Operate 4 centrifuges and aliquot serum, plasma and urine into labeled tubes for chemistry and send-out testing.
- Resolve 20-30 labeling problems a night with client offices by phone before specimens expire.

Phlebotomy Technician

Bay Area Family Clinic — Brandon, FL — 01/2025 - 08/2025

Phlebotomist at a 6-provider primary care clinic.

- Drew blood from 25-35 patients a day, including children and patients with hard-to-find veins.
- Labeled, spun and packaged specimens for courier pickup with zero rejected samples in 6 months.
- Checked in patients and verified orders and insurance details in the clinic's EHR.
- Tracked supply use at 4 draw stations, ending month-end shortages of tubes and needles.
