Summary

Tower technician with 3 years of climbing on monopoles, self-support and guyed towers up to 450 ft across the Midwest. Installs antennas, radios and fiber jumpers with safe rigging techniques, runs line sweep and PIM tests, and works independently or in a 4-person crew. Travels 4-5 days a week with a clean driving record.

Experience

Tower Technician 05/2024 - Present
Great Plains Tower Services Omaha, NE

Climber on a 4-person wireless construction crew.

- Install antennas, remote radio units and hybrid cables on **70+** cell sites for 5G upgrades.
- Set up gin poles and capstan hoists for loads up to 900 lb with zero dropped objects.
- Run line sweep and PIM tests, passing 97% of sectors on the first closeout submission.
- Document site photos, torque values and closeout packages so carrier reviews close within 5 business days.
- Ground new equipment and bond cable entry ports, passing 100% of carrier grounding audits in 2025.

Tower Climber 08/2023 - 04/2024
Heartland Wireless Construction Lincoln, NE

Ground hand who moved up to climber after authorization.

- Built rigging, tagged loads and ran the hoist for climbers on **40** tower projects.
- Climbed to 300 ft for antenna mounts and coax inspections after earning climber authorization.
- Loaded trucks and staged material each morning, completing 100% of site safety checklists.
- Torqued and weatherproofed 500 connectors to carrier specs during sector upgrades.
