SUMMARY

Water treatment operator with 6 years in public water systems, including 4 years at a 25 MGD surface water plant under a Virginia Class 3 Waterworks license. Doses treatment chemicals from jar testing and SCADA analyzers, handles water quality sampling, and builds shift reports in Excel and Microsoft Office with no reporting errors.

EXPERIENCE

Water Treatment Operator

05/2022 - Present

James River Regional Water Authority

Richmond, VA

Conventional surface water plant producing 25 MGD for 220,000 people.

- Operate rapid mix, sedimentation and dual-media filtration for a **25 MGD** plant on rotating 12-hour shifts.
- Adjust alum, caustic and fluoride feed and run chlorine disinfection from jar tests and online analyzers.
- Collect 40 process and distribution samples a week for chlorine residual, turbidity and bacteria tests.
- Record shift data in Excel for monthly state reports, with no reporting errors since 2023.

Water Distribution Technician

08/2020 - 04/2022

Appomattox River Utilities

Petersburg, VA

Water utility with 400 miles of main and 18,000 service connections.

- Flushed **600** hydrants a year and recorded chlorine residuals at dead-end mains.
- Repaired 50 main breaks and service leaks a year with a 4-person crew.
- Replaced 300 residential meters and logged readings on a handheld computer.
- Exercised 900 valves a year and reported broken ones for the capital repair list.
