Summary

Workday Integration Developer with 6 years building HR and finance integrations, including 4 years on Workday Studio, Core Connectors and EIB for a 15,000-employee semiconductor company in Austin. Writes XSLT and XPath for document transformation, connects REST and SOAP services, and keeps 70 production integrations running.

Experience

09/2022 - Present
Austin, TX

Workday Integration Developer

Hill Country Semiconductor

Chip manufacturer with 15,000 employees in 6 countries.

- Maintain **70** production integrations to payroll, benefits, badge and identity systems with 99.8% on-time runs.
- Build 15 Workday Studio integrations for global payroll vendors, using XSLT for document transformation.
- Design REST and SOAP calls to Workday Web Services for a real-time identity sync covering 15,000 workers.
- Resolve 25 failed integration events a month and write runbooks so support teams fix repeat issues.

06/2020 - 08/2022
Austin, TX

Integration Developer

Pecan Street Software

HR software vendor serving 300 mid-size customers.

- Wrote XML and XSLT mappings for **40** customer payroll file formats.
- Built REST endpoints that cut customer onboarding time from 6 weeks to 3.
- Tuned XPath expressions on large benefit files, reducing processing time by 50%.
- Closed 120 customer integration tickets a quarter with a 95% satisfaction score.

05/2019 - 08/2019
Round Rock, TX

Software Engineering Intern

Lone Oak Data Systems

Summer internship on a data exchange product team.

- Wrote Python scripts that validated **2,000** test XML files.
- Fixed 30 bugs in a flat-file parser before the fall release.
- Documented 12 API endpoints for the customer developer guide.
